Connecting to your home folder on a Mac

Connect to CampusNet.

Select the “Finder” from the Dock or by clicking anywhere on the desktop, open the “Go” menu and click on “Connect to Server”.

![Go menu screenshot]
In the “Server Address” field type the network location of your home folder. For undergraduate students, this should be ‘smb://wide.students.ad.stir.ac.uk/users/first letter of surname/username’.

For staff, this varies according to your department but will probably take the form of ‘smb://<server name>.ad.stir.ac.uk/<share name>’.

Click on the “+” icon to add this to your list of favourite servers.

You may see an authentication window, use your university username and password here.

You should now have access to your network folder.
