MSc
Heritage
(Heritage and Environment Pathway)
Our MSc Heritage provides you with a state-of-the-art, critically informed, interdisciplinary education in heritage and its place in society, including its conservation, management and interpretation.

Heritage is a global phenomenon with diverse economic, social, and political roles. It encompasses the surviving tangible and intangible traces of the past, but also the processes and practices that frame heritage in the present and produce particular kinds of futures.

The aim of this course is to provide a critically informed interdisciplinary education in heritage, with three pathways: Cultural Heritage Studies; Heritage and Environment; Digital Heritage. You may choose to specialise in one of these pathways or opt to take the broad course without specialisation.

The Heritage and Environment pathway enables you to develop interdisciplinary perspectives on the challenges facing heritage and the environment ranging from the local to the global. Current crises, such as climate change, extreme events, migration, conflict and poverty, make heritage and the environment more inextricably bound together than ever. You will develop specialist knowledge of the issues facing heritage in the Anthropocene era, and be ready to support more sustainable and resilient heritage futures.

The MSc Heritage with its multiple pathways is a vibrant and diverse course led by a close-knit academic teaching team who work in partnership with students. Students come from a range of national and disciplinary backgrounds (across the Arts and Humanities, Social Sciences, Computing Science and Natural Sciences), as well as those in the workforce who wish to upgrade their skills, change their career, or simply obtain a higher qualification.
The MSc provides you with excellent training for a career in the heritage sector, and/or doctoral study, supported by critical-thinking, in-depth knowledge and wide-ranging skills. Successful graduates will be extremely well-placed to address current challenges and debates surrounding heritage and play an active role contributing to sustainable and resilient heritage futures.

The course supports you to develop strong skills to help you maximise your time at university and develop the graduate attributes employers look for. Fieldtrips, case studies, and input from heritage professionals offer first-hand, experiential learning in varied settings.

Cutting-edge research training will provide you with excellent support for supervised independent research in your Dissertation. You will have the opportunity to choose between a standard dissertation or a work-related dissertation in association with an external partner. Successful completion of the course (with merit or distinction) will also provide you with a strong foundation for doctoral study in a range of related disciplines.

The University of Stirling’s new PhD in Heritage provides an attractive progression route for top students graduating from this degree, alongside a host of PhD programmes elsewhere in this expanding field.

As an MSc student, we encourage you to attend research events organised by the Centre for Environment, Heritage and Policy and play an active role in our research culture alongside PhD students and academic staff. We also have strong links with the Scottish Graduate School in the Arts and Humanities and our experienced staff can offer bespoke support for successful students wishing to pursue doctoral research.

On successful completion of this course, you will have developed the following graduate attributes:

1. Intellectual excellence in a specialised heritage pathway
2. Critical, creative and reflective thinking
3. Substantial autonomy and responsibility
4. Professionalism, adaptability and resilience
5. Advanced interpersonal, teamwork and communication skills
6. Inclusivity, tolerance and mature understanding of diverse identities and values
7. Active citizenship and ethical judgement
8. Social, cultural and environmental awareness

Five Reasons

YOU SHOULD CHOOSE THIS COURSE

1. Acquire an excellent foundation in the conceptual and theoretical debates surrounding heritage and environment taught by leading academics.

2. Gain a robust grounding in practical aspects of heritage management and conservation, enhanced by option modules from Stirling Management School.

3. Benefit from small-group, experiential learning led by an enthusiastic teaching team, with ‘real world’ case studies, fieldtrips and guest heritage professionals.

4. Learn within an interdisciplinary framework drawing on modules from a wide range of disciplines, enables you to develop diverse, advanced skills.

5. Experience cutting-edge research training from academics at the forefront of their fields, providing you with an excellent foundation for independent research.
Core modules provide a foundation in current conceptual and theoretical debates about the nature of heritage and its importance in society, as well as practical issues relating to its conservation and management.

The broad range of option modules for the Heritage and Environment Pathway allows students to specialise in areas relevant to current national and global challenges (including conserving and managing heritage in the Anthropocene, identity, memory and place-making, environmental impact assessment, international law and sustainable development). Case studies, fieldtrips and input from heritage professionals introduce students to specific kinds of heritage and ‘real-world’ challenges, demands and opportunities. Cutting-edge research training provides students with an excellent foundation for conducting independent research in the Dissertation, whilst vocational skills are embedded throughout the course to produce competitive, work-ready graduates.

MODULES FOR THE HERITAGE AND ENVIRONMENT PATHWAY

Core (compulsory) modules:
- Heritage: Critical Perspectives
- Heritage as Practice: Conservation, Management and Interpretation
- Research Skills
- Heritage and Environment Dissertation / Work-Related Dissertation

Heritage and Environment Pathway option modules:
- Heritage, Identity and Place
- Understanding and Managing Historic Environments: a Scottish Perspective
- International Law and Sustainable Development
- Environmental Impact Assessment
- Interdisciplinary Approaches to the Medieval Past

ELECTIVE OPTION MODULE LIST

Additionally you can select one module from this ‘elective’ option list:
- Digital Heritage and Museums
- Curating and Collecting: Approaches in Museums and Heritage
- Heritage in Asia: Contemporary Challenges in a Globalised World
- Tourism and Strategic Public Relations
- Measuring Social Outcomes and Impacts
- Human Animal Interactions
- Intangible Heritage in Asia and Beyond

Or two ‘elective’ modules with Stirling Management School:
- Project Management
- Managing Change
- Strategic Management
- Innovation Management
- Social Marketing

KEY TEACHING STAFF

Dr Chiara Bonacchi, Lecturer
Dr Sally Foster, Senior Lecturer
Dr Qian Gao, Research Fellow

Professor Siân Jones
Dr Jennie Morgan, Lecturer
Professor Ian Simpson

Modules are subject to change as the University regularly revises and refreshes the curriculum of our taught courses.
ENTRY REQUIREMENTS

A minimum of a second class Honours degree (2.1 preferred) or equivalent is normally required. Applicants without these formal qualifications, but with significant appropriate work experience, are encouraged to apply.

LANGUAGE REQUIREMENTS

If English is not your first language you will need to provide evidence of your proficiency in the English language. An IELTS score of 6.0 with 5.5 minimum in each skill is required.

If you don’t meet the required score you may be able to register for one of our pre-sessional English courses. To register you must hold a conditional offer for your course and have an IELTS score 0.5 or 1.0 below the required standard. For more information, go to: stir.ac.uk/tae
