ECONOMICS FOR BUSINESS AND POLICY

REDEFINE AT STIRLING

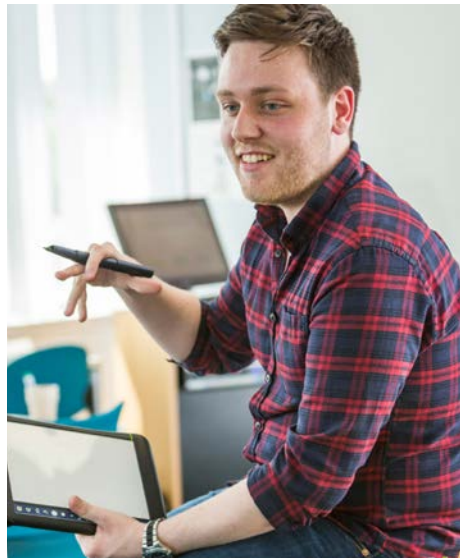

WHY STUDY AN MSc ECONOMICS FOR BUSINESS AND POLICY?

This course will develop your knowledge and analytical skills for a successful career as a business and policy analyst in the public, private or non-profit sectors. You'll learn about interactions between international institutions, governments and households and develop an appreciation of the insights that economic analysis can bring to business and policy.

You'll develop skills in decision making and critical analysis. The course also develops your skills in evaluating business performance, management styles, official statistics, public, social and macroeconomic policies and their effect on businesses and households. It is aimed at students from a variety of backgrounds, including those with no previous training in this area.

Excellent links with industry and policy think tanks build on our strong engagement with businesses, past and current research projects as well as our ties with the Behavioural Science Centre, Centre for Sustainable Practice and Living (CSPL) and The Centre for Constitutional Change.

We work with organisations across the business landscape, from Wood Mackenzie and ScottishPower through to Zero Waste Scotland and the Institute for Fiscal Studies. You'll get to know the markets and environments these organisations work in through a mix of site visits, guest lectures and your consultancy project developed with public, private and non-profit sector organisations.

The course reflects the applied research and consulting projects of our teaching staff, so you get access to the latest thinking on the most relevant developments in business and policy. These include fiscal policy, unemployment, family, environment, public health, and ageing.

The course has particular emphasis on:

- Current debates at macro and micro level. For example, the impact of Brexit on business, how can we prevent recessions, and how the national living wage can affect businesses and welfare.
- Situations in which markets do not function properly, and justifications for public intervention.
- The role and function of the firm and its relationship with employees and society as a whole.
- Good working knowledge of techniques that support robust business and management analysis, performance and decision making.

STRENGTHS

OUR GLOBAL REPUTATION

We are listed among the best universities in the world. The University of Stirling is ranked 3rd in Scotland and 32nd in the UK in the Times Higher Education Student Experience Survey 2017. We're also 1st in Scotland for welcoming international students (The International Student Barometer 2016).

LEADING SCHOLARS IN BUSINESS AND POLICY

You'll engage with academics who have conducted outstanding research in the field of business and policy. This research feeds directly into the course material.

UNIQUE, PRACTICAL LEARNING

Students will be immersed in the practical aspects of business and policy analysis, acquiring skills, knowledge and expertise by engaging with real-world organisations. These include large companies, small and medium enterprises, the public sector and NGOs.

NETWORKING OPPORTUNITIES

Many of our postgraduate students come from overseas. Studying at Stirling offers an excellent opportunity to establish your own global network of contacts at the outset of your career.

REAL-WORLD EXPERIENCE

You will be given the opportunity to work on consultancy-style projects with external clients and engage with influential networks, such as Healthy Ageing in Scotland (HAGIS), the Behavioural Science Centre (BSC), Centre for Sustainable Practice and Living (CSPL) and The Centre for Constitutional Change.

IDEAL ATMOSPHERE FOR A SUSTAINABLE EXPERIENCE

The University of Stirling has one of the most beautiful and green campuses in the world and aims to reduce its carbon emissions by 38% by 2020.

This exciting new course is different from others because it focuses on applying economic thinking to real world business and policy challenges. ””

DR MIRKO MORO
Course Director

CAREER OPPORTUNITIES

98% of our postgraduate leavers are in employment or further study within six months of graduating from Stirling (Destinations of Leavers from Higher Education survey 2015/16). You will benefit from the excellent links with industry and policy think tanks offering a truly research-led course.

The MSc will prepare students for a broad range of roles, including:

- Business analysts with large organisations in energy, transport, and healthcare sectors
- Officials in regulatory agencies
- Market and data analysts for multinational companies, charities, news and media
- Economists in investment banking and other bank departments
- Officials in international organisations such as the European Union, UNIDO, UNEP
- Economic, investment and management consultancies
- Analysts and managers in non-profit organisations
- Local government and development agency officials
- Commercial analysts and financial advisers
- Environment and energy analysts
- Health managers
- Business and corporate managers
- Research officers in think tanks
- Academic posts, such as research assistants/fellows and lecturers in university and research institutes
