Asian Fisheries Society Indian Branch (AFSIB) | ICAR - Central Institute of Fisheries Technology
Fisheries sector plays a very important role in the economics, social and nutritional well being of people in the Asian countries, which often figures as an important component in rural development and poverty alleviation.

In India, the sector has been recognized as a powerful income and employment generator to over 14 million fishers and farmers. The sector offers cheap and quality animal protein to the people ensuring nutritional security. With a value of fisheries export of about Rs.30,000 crores, the fisheries sector plays a major role in stimulating and strengthening the economic growth of the nation. The Government policies are also attuned towards ushering 'Blue Revolution' (Neel Kranti) by sustainable utilization of fisheries wealth of the country for improving the lives and livelihoods of fishers and their families. However, several issues such as overfishing, stagnation of marine fish production, impact of climate change, disease in aquaculture and quality of sea food and trade related issues have emerged in recent years. All these, call for an integrated strategic planning at the national level to take stock of our achievements, capabilities, challenges as well as opportunities.

The Asian Fisheries Society – Indian Branch (AFSIB) (Regd. No. 41/87-88) since its inception in 1986, has been providing a platform for discussion at the national level on issues related to research, development, education and policies by organizing Indian Fisheries & Aquaculture Forum (IFAF) every three years in different parts of the country. The 11th Indian Fisheries and Aquaculture Forum (11th IFAF) will be hosted by the ICAR-Central Institute of Fisheries Technology (ICAR-CIFT), at Cochin, Kerala during 21-24 November, 2017. It would provide a comprehensive outlook for the Fisheries and Aquaculture sectors, for achieving greater synergy among the stakeholders and planning strategies for capture fisheries and aquafarming to build higher levels of sustainability and profitability in line with Blue Growth Initiative.

Objectives

- Provide a scientific platform to deliberate on the current research outputs and identify the research and development needs of the sector
- Nurture innovation skills to address issues of sustainability and safety of fish.
- Encourage scientists to think, develop and undertake need-based research to address core issues affecting fisheries sector
- To review the research developments in fisheries science and develop strategies for transfer and refinement of these technologies.

Technical Sessions

1. Fisheries Resources: Genetics, Biodiversity and Management
2. Fishing Systems for Sustainable Fisheries
3. Fishery Biology, Toxicology and Environment
4. Aquaculture production
5. Aquatic Animal Health Management
6. Adding Value to Fish: Avenues in Fish Biochemistry & Processing
7. Safe Fish: Quality, Risk Assessment and Regulations
8. Fishomics and Frontier Sciences for Blue Bio-economy
9. Socio-Economics, Gender, Capacity Building and Livelihood
10. Fisheries Trade, Policy and Governance

The authors of the accepted research papers can present their papers in oral/poster sessions during the forum. The details of oral/poster sessions will be updated in the website: www.11ifaf.in.
CLIMATE CHANGE AND FOOD SAFETY ISSUES is scheduled to be held during the forum on 22 November 2017.

SEAFOOD PROCESSORS CONCLAVE
An interaction of the fishers, aquafarmers, entrepreneurs, scientists, policy makers and other stakeholders will be organized during the forum to get feedback on the emerging policy issues and for reprisal of the concerns of the stakeholders in the industry.

REGISTRATIONS

<table>
<thead>
<tr>
<th>Early bird REGISTRATION</th>
<th>Late / spot REGISTRATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Members of AFS/AFSIB</td>
<td>US $ 250</td>
</tr>
<tr>
<td>Non-members of AFS/AFSIB</td>
<td>US $ 300</td>
</tr>
<tr>
<td>Members of AFS/AFSIB</td>
<td>₹6000</td>
