Be Stirling
BE THE DIFFERENCE
Health Sciences at the University of Stirling has a transformative strategy that is dedicated to effecting change to global well-being.

We lead the way in world-class multidisciplinary research in key areas affecting individuals and society: cancer, public health, social marketing, health behaviours, self-management, mental health, physical activity, and maternal and child health.

The Faculty’s primary mission is to be the natural first choice for everyone with an interest in health, to develop global citizens through internationally relevant curricula and to deliver excellence in teaching and learning.

Careers in health sciences are dynamic as the healthcare sector responds to developments in health and emerging health priorities, rising expectations among users and carers and changing societal attitudes.

We offer a range of on-campus and online learning courses, to suit your lifestyle and career aspirations.
