NURSING (ADULT)
BSc / BSc (Hons)

ARE YOU STIRLING?
WHY STUDY ADULT NURSING?

Adult nursing is both a challenging and rewarding profession. Adult nurses provide compassionate care to adults who experience a range of acute or long-term conditions, promote health and wellbeing and empower individuals to maximise their independence.

Nurses are based within multi-disciplinary teams, working alongside individuals, families and other supportive networks to provide collaborative person-centred care. It is essential that you enjoy working and communicating with people of all ages and backgrounds and that you respect people’s rights, beliefs and values.

An Adult Nursing degree from the University of Stirling will prepare you to meet the needs of a modern profession and to provide the best possible patient care. You will leave us as a confident and capable practitioner, fully equipped to join a health care team post-graduation.

COURSE DETAILS

BSc Nursing (Adult or Mental Health) course extends over three years and the BSc Honours Nursing (Adult or Mental Health) over four years. Each academic year runs over 45 weeks and has an equal balance of theoretical and practice learning. This contemporary and innovative course facilitates the achievement of competencies required for registration in the UK as a nurse within the Adult field of practice. It will help students develop the knowledge, skills, attitudes and values that are essential to deliver safe, compassionate, respectful, ethical and effective care in an evolving and dynamic health and social care environment.

Utilising a blended approach to learning, key subject areas studied include health, social and behavioural sciences, communication, ethics and essential clinical skills. The course will include topics common to all areas of generic nursing and those specific to Adult or Mental Health nursing. This means that some classes will be shared whilst others will concentrate on your chosen field.

Assessments in both theory and practice will be undertaken in each semester. These must be passed before progressing to the next semester.

REASONS TO CHOOSE THIS COURSE

1 AN AWARD-WINNING NURSING DEGREE
The University of Stirling has won nine Student Nursing Times Awards since 2012, including Educator of the Year in 2018.

2 PROFESSIONAL EXCELLENCE
Our nursing course received multiple commendations from the Nursing and Midwifery Council including for our close working relationships between practice partners.

3 GREAT CAREER PROSPECTS
More than 97% of our undergraduate leavers are in employment or further study within six months of graduating (Destinations of Leavers from Higher Education survey 2016/17).

TOP 5 IN SCOTLAND FOR NURSING
The Guardian University Guide 2020

This means that some classes will be shared whilst others will concentrate on your chosen field.

Assessments in both theory and practice will be undertaken in each semester. These must be passed before progressing to the next semester.
PRACTICE LEARNING EXPERIENCES
Practice learning forms an integral aspect of the course. A diverse range of practice placements are available, from community settings and care homes to acute hospital wards and specialist areas. Students may work both day and night shifts to coincide with the patterns of the area and their allocated practice mentor.

STUDENT SUPPORT
Each student is allocated a personal tutor who will be a source of guidance, information and support for the duration of their time on the course. Whilst undertaking practice learning experiences, students are allocated a practice mentor who will facilitate and support learning in practice.

“Studying at the University of Stirling has been the most influential part of my life so far. Undertaking a degree away from home was always going to be hard but I found that studying here in Stirling was like a second home for me. I felt that there was always somebody’s door open to me if I had any problems.

I feel that the University has developed me from a student nurse to a highly skilled nurse. The academic staff have always been there for me and they have involved me in other activities outside of my studies that will inspire my practice forever.”
Ciarán Callaghan
BSc Nursing (Adult) graduate

CAREER OPPORTUNITIES
This course is the beginning of a career which involves ongoing professional development.

Usually our graduates consolidate their learning initially by working, for example, in a hospital, community setting or care home. They will progress to more senior positions or diversify into specialist nursing roles through undertaking further postgraduate studies. Some examples of the roles our graduates hold within the healthcare sector include:

- Staff nurses
- District nurses
- Health visitors
- Occupational health advisors
- Advanced nurse practitioners
- Senior charge nurses
- Nurse educators
- Clinical researchers
- Nurse Consultants
