

PBL

PBL

IgM<sup>+</sup> cells

NCC/T-cell

Released from monocyte

UV exposed PBL

**Supplementary figure 3:** Fixed cells captured with Scanning Electron Microscopy (SEM) of (A,B) peripheral blood leukocytes (PBL) exposed to recLGP3, and enriched populations of (C) IgM<sup>+</sup> cells, (D) NCC/T-cells, (E) monocytes exposed to recLGP3. (F) UV exposed peripheral blood leukocytes.
